

Wrist Sizer

For the most accurate wrist size, review your printer settings first. Page scaling should be set to none and the PDF prints at 100%

To confirm the accuracy of the print out - measure the one inch marker in the sample box at left with a ruler after printing. If this does not match exactly your wrist measurement will be inaccurate.

How to measure your wrist:

print the wrist size guide and cut out the paper wrist sizer.

With the number markers on the outside curl the wrist sizer into a circle and carefully insert the point through the small cut opening at the end.

Place your hand through the wrist, sizer, and gently pull the pointed end through the slit until the wrist sizer fits comfortably around your wrist.

The number that lines up with the arrow is your wrist size. If the measurement is between two sizes, refer to the larger size.
